-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Brooks et al (4,582,981).

Brooks teaches a glow plug 10 comprising a body 12 having threaded means 48 for affixing the glow plug to the engine block, the body having an outer shell 12 surrounding an inner cavity 14, the outer shell 12 having a hexagonal portion 50 having six faces a circumferential groove 95 formed horizontally in the outer shell and extending completely across all six faces of the hexagonal portion, wherein the hexagonal portion has an upper end and a lower end adjacent the base 12 and the circumferential groove 95 is located nearer the base 12 than the upper end which surrounds an insulator member 44 (Fig. 1).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3742

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brooks in view of Bhat et al (4,088,105).

Brooks teaches substantially the claimed invention, but is silent regarding a size of the hexagonal portion and a size of the groove. Bhat teaches a glow plug 1 comprising a shell 10 that has a hexagonal portion 11 having threads of 0.25 inches and a root diameter of 0.223 inches. It would have been obvious to one having ordinary skill in the art to modify Brooks's invention to include a hexagonal portion and a groove diameter as taught by Bhat in order to affix the glow plug to an engine block as conventional in the art.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 5507255 (glow plug with hexagonal portion), 4418661 (glow plug with hexagonal portion), 4088944 (glow plug with hexagonal portion).
